

# Mini LIFTPLAQ®

LE LÈVE-PLAQUE MAGNÉTIQUE

## AN EFFECTIVE ALLY

The **MINI-LIFTPLAQ®** is a **tool to aid the handling of manhole covers and plates of small sizes.**

Praised by the major players in dry and wet networks (construction industry, telecom, road system and urban public utilities...), this mini plate lifter will be **your daily ally thanks to its very quick setting up.**

It combines lightness, time saving and respect for health, since it **helps reduce the risk of accidents and musculoskeletal disorders (MSDs).**

VIDEO

## SAFE HANDLING

The **MINI-LIFTPLAQ®** secures the operator because the handle remains in position thanks to its clamping screw and the operator **no longer needs to bend down** to move the plate or manhole cover.

**The magnet is suitable for loads of 30Kg** while respecting the correct gestures and postures in order to the operator does not force during the handling.

This **permanent magnetic system** does not lose any magnetization over time and does not require periodic controls.

## A TOOL EASY TO USE

The **MINI-LIFTPLAQ®** allows to **intervene quickly** on underground networks because it is **light (3,5kg), retractable and compact.**

Thanks to its adjustable handle at **3 different heights**, it **adapts to the size of the operator** which facilitates handling and allows to **keep an ergonomic posture.**

# A MINI PLATE LIFTER SIMPLE AND LIGHT

## MINI-LIFTPLAQ® DIMENSIONS

- ▲ **Height** handle retracted: : 470 mm
- ▲ **Height** handle out: 750 ou 850 mm
- ▲ **Width** at handles: 310 mm
- ▲ **Weight**: 3,5 kg

## USE

### STEP 1

Keep the **label visible** from above for handling and **lock the handle**

### STEP 2

**Magnetize** on the edge, **lift and pull**

### STEP 3

Lower the handle and the magnet in the **opposite direction to unhook**

### STEP 4

Possibility to **manipulate** with **2 MINI-LIFTPLAQ®**
